Additional Options & Services

Options & Services	Catalog Number	Price
Standard installation with technical training	104403GR	\$2,860
Installation validation (IQ/OQ/PQ) - includes qualification Plate	104409GR	\$5,335
1 year plate re-qualification	104402GR	\$1,320
On-site Inspection	104408GR	\$2,365
Repair Services		Contact Account Manager

*On-site installation not available when imager is purchased through an imager placement program.

**Plan Extensions include one additional on-site visit.

Description of Services

Technical support - Online, email, phone (telephone support available for service inquires during business hours - 8:00 a.m. - 5:00 p.m. MT)

Imager installation and training - Quansys will send a technical support representative on-site to un-package, install imager, and train staff.

Software updates - Upgrades Q-View™ Software via web

Expedited on-site support - Quansys will send a technical support representative on-site to support user-related damage or failure. This covers travel and labor but not cost of materials.

Rapid exchange - If an imager were to stop working, for whatever reason, a replacement imager will be shipped to the customer to all of continuity of testing.

Moving: Relocation, re-validation and retraining assistance - Quansys will send a technical support representative on-site to inspect, re-install and re-validate imager after a move. Re-validation is only performed on imagers that have had an IQ/OQ/PQ.

Total on-site visits - Total number of visits per plan.

On-site inspection - Quansys will send a technical support representative on-site to inspect and ensure the imager is functioning properly.

Please note, plans that include on-site visits apply to travel within the continental US only. Any place outside the U.S. additional travel fees may apply. Contact a representative for further questions.

The Q-Plex™ Array

Spotting in 96 Well Plate

- ▶ Robotic liquid handlers print 20-50nL spots of capture antibody
- ▶ Each spot is a unique assay within the well
- ▶ Low spot-to-spot variability (CV)
- ▶ Spot size 350-500µm
- ▶ Plates are QC'd for spot quality

Performing the Assay

- ▶ Add as little as 50µL of sample
- ▶ Wash
- ▶ Add mix of detection antibodies specific to kit
- ▶ Wash
- ▶ Add streptavidin conjugated HRP or IR-Dye

Detection of Sample

- ▶ With the addition of substrate, a response is produced
- ▶ If antigen is present the spot emits a signal proportional to the amount of antigen in the sample
- ▶ If no antigen is present, the spot is not visible

Image Capture

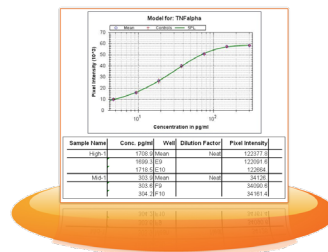

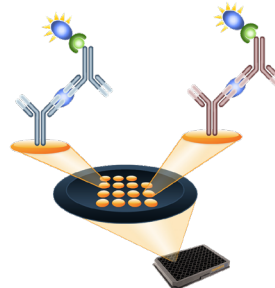

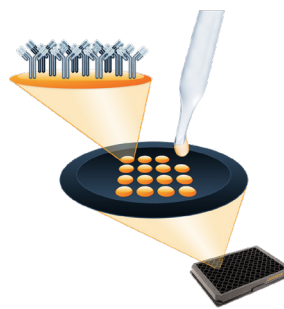

- ▶ An image of the plate is taken via a high resolution camera (Q-View™ Imager LS or approved gel doc system) or fluorescent scanner (LI-COR Odyssey)
- ▶ The image file (TIFF) is imported into Q-View™ Software and a Q-View™ Project is created

Image Analysis

- ▶ Image is opened in Q-View Software
- ▶ Spots are automatically found on plate image
- ▶ Intensity of spot response is measured and raw data is generated
- ▶ User imports product specs and well layout

Data Analysis

- ▶ Raw data is analyzed and compared to in-plate standard
- ▶ Regression models used to calculate unknowns
- ▶ Standard curves are calculated and sample and statistical data is exported

Increase productivity with Quansys products and services. Save time, sample, and money.

Q-Plex™ ARRAYS

Our Q-Plex Arrays are quantitative multiplex ELISAs with distinct proteins deposited in a defined array. Choose one of our standard kits for immediate delivery or customize the exact array you need.

Q-View™ IMAGERS

The Q-View™ Imager LS is a high quality, low-cost imaging systems for chemiluminescent assay imaging.

Q-View™ SOFTWARE

The Q-View Software is a user-friendly image analysis app that enables the acquisition and analysis of large amounts of multiplex ELISA data.

SAMPLE TESTING SERVICE

Our lab runs immunoassays on a wide variety of biological samples. Increase productivity and focus on your core research while we test your samples for you.
