

## Mouse HS Multiplex ELISA Kits

The Q-Plex™ Mouse kits have recently been enhanced with greater sensitivity! Reliably see mouse biomarkers at the picogram/mL level with the Q-View™ Imager platform. Quansys' ever growing analyte library, world class customer service, and straightforward technology and protocols help you get the data you need fast and reliably.

Each Q-Plex™ Mouse Cytokine kit contains a 96-well plate built by adsorbing four to sixteen distinct capture antibodies in a defined array to the bottom of each well. Each kit also contains high-quality reagents required to perform testing to help ensure the accuracy of results.
