

Four New NHP Q-Plex Kits at Quansys Biosciences

We have launched four new non-human primates (NHP) multiplex ELISA kits. Combined, the four new NHP kits encompass around 35 different analytes that can be used to detect biomarkers in NHP samples. These kits will allow more options for your customers when looking for a reliable source of multiplex ELISAs.

Benefits Include:

Competitive Sensitivity

The Q-Plex NHP kits have comparable or better sensitivity than competitor products. Customers can trust in broad assay ranges to get the data they need.

Quick Lead Times

The average lead time for retail products is two weeks. Custom kits will have a slightly longer lead time with a two-kit minimum on orders.

Consistency with Results

Q-Plex is known for consistent, reliable results. You can count on us to deliver a quality product every time, with low lot-to-lot variability.
